

# DEPRIVATION IN ENGLISH CONSTITUENCIES

## Key

Party represented (colour)		Deprivation profile (shape)
Member of Cabinet (box)		
Constituency Name		Uxbridge and South Ruislip
MP Name		Boris Johnson (MP)
Role in Cabinet		

Deprivation profiles of Westminster Parliamentary Constituencies in England. Each shape shows the number of small areas (LSOAs) in each constituency in each deprivation quintile. A shape with a wide bottom indicates a constituency contains more deprived areas, while an area with a wide head indicates there are more non-deprived areas in the constituency.

Constituencies have been sorted by the average deprivation rank of small areas. Wokingham is the least deprived constituency. Walton in Liverpool is the most deprived.

Each shape shows the deprivation profile, the name of the constituency, and the name of the MP as at February 2020. Shapes are coloured according to the political party that the MP represents. Cabinet members have been highlighted, along with a short description of their role.

Visualisation created by Jamie Whyte - @northernjamie - in RStudio, with layout by Julian Tait - @julianstar - in Adobe Illustrator.

For data and more information about the indices of deprivation, please see <https://www.gov.uk/government/statistics/english-indices-of-deprivation-2019>
